EXPERIENCE

Moonrise - Full Stack Software Engineer | March 2020 - March 2021

- Implemented brand cohesion/color scheme updates for multiple platforms including company website, and Remote-I9 and RemoteCall projects using Bootstrap, HTML, Sass, and PHP
- Fixed bugs in the user flow process and optimized form validation using [technologies] for the Remote-I9 platform

Platform:

- Fixed timeclock and scheduler-related issues, created feature flags for dev team, pair programmed with senior devs, worked extensively with database and created many SQL queries in PHP for rendering data.

Remote-I9:

- Implemented brand cohesion/color scheme updates to assist in progressing application beyond the MVP phase. Also fixed bugs in the user flow process and optimized form validation.

RocketRefill:

- Contributed to conception, prototyping, and building of the MVP for this app.

moonrise.works:

- Implemented brand cohesion/color scheme and content updates for company website using Bootstrap, HTML, Sass, and PHP.

RemoteCall:

- Fixed critical issue where workers were working rideshare/ delivery gigs and providing remote cold calling services for our parent company's insurance agents at the same time by logging into our app on mobile. Implemented brand cohesion/color scheme updates to assist in progressing application beyond the MVP phase.

Independent Contractor - Web Developer/Graphic Designer | Sep 2019 - Dec 2020

Middle Eastern Immigrant and Refugee Alliance:

- Built a front end to coordinate with their rebrand and new logo utilizing a theme uploaded to a CMS (WordPress). Designed a new brochure to coincide with their rebrand using Adobe InDesign. Utilized SEO to help solve their issue of lack of traffic on their current site as well as make the new site more donor focused.

Aquarium Exotics:

- Performed SEO on client's existing website as well as helped the client map out a viable marketing strategy to increase the traffic on their site and social media pages.

Aspiritech - Software QA Analyst/Job Coach | Sep 2017 - Mar 2019

- Performed accurate and thorough quality assurance on various software and hardware produced by major tech companies, primarily Bose prototypes. Provided detailed bug reporting, troubleshooting solutions, and workarounds for the client.
- Worked one-on-one with testers on the Autism spectrum to improve accuracy, productivity, morale, and confidence.

Self-Employed - Freelance Graphic Designer | Jan 2015 - Sep 2017

- Consulted with clients to determine what design ideas and aesthetics would compliment as well as bolster their brand.

TransTech Social Enterprises - Front-End Developer/Graphic Designer | Sep 2014 - Aug 2015

- Performed front-end development on CMS platforms such as WordPress using visual composers as well as writing original HTML/CSS code.
- Utilized Adobe Photoshop and Illustrator to create logos, pamphlets, posters, etc, as well as designs for social media platforms such as Facebook cover photos.

EDUCATION

Actualize - Certificate in Full-Stack Web Development | May 2019 - Sep 2019
